JUNIOR SECURITY ANALYST INTRO WITH TRY HACK ME

1.1 Introduction

In this module, we will explore the key responsibilities of a Junior Security Analyst, including daily tasks and workflows. We will also look at the different roles we interact with and how collaboration supports security operations.

2.1 Junior Security Analyst Journey

My daily duties as a SOC will be:

1. Monitor and investigate various security alerts
2. Participate in SOC brainstorms and workshops
3. Cooperate with other teams to keep your company safe
4. Constantly learn and discover new attacks and defenses

Which team do you work with as a Junior Security Analyst?

Answer: **SOC**

Answer the questions below

Which team do you work with as a Junior Security Analyst?

SOC

✓ Correct Answer

3.1 Security Operations Center(SOC)

A lot of people support the junior security analyst. SOC engineers are configuring the security tools, senior analysts are helping with complex attacks, and a manager is trying to keep everything under control. A Security Operations Center (SOC) is your big team that protects the company

The screenshot shows a web application interface for a security analyst. At the top, a notification states "IP Address copied to clipboard" with the IP address 221.181.185.159. The main heading is "A Day In the Life of a Junior Security Analyst". Below the heading, instructions read: "Inspect your SIEM dashboard, copy the malicious IP from the critical alerts, and switch to the IP Hunter tab." The interface features a navigation bar with four tabs: "SIEM Dashboard" (selected), "IP Hunter", "Escalation", and "Firewall". The "SIEM Dashboard" tab displays a table of alerts.

Date	Severity	Message	Copy
Mar 19th 2026 at 12:22	Critical	Successful SSH login from the suspicious IP address 221.181.185.159	
Mar 19th 2026 at 12:18	Critical	Unauthorized login attempts from IP address 221.181.185.159 to port 22	

The bottom of the screenshot shows a Windows taskbar with various application icons and a system clock indicating 1:32 PM on 3/19/2026.

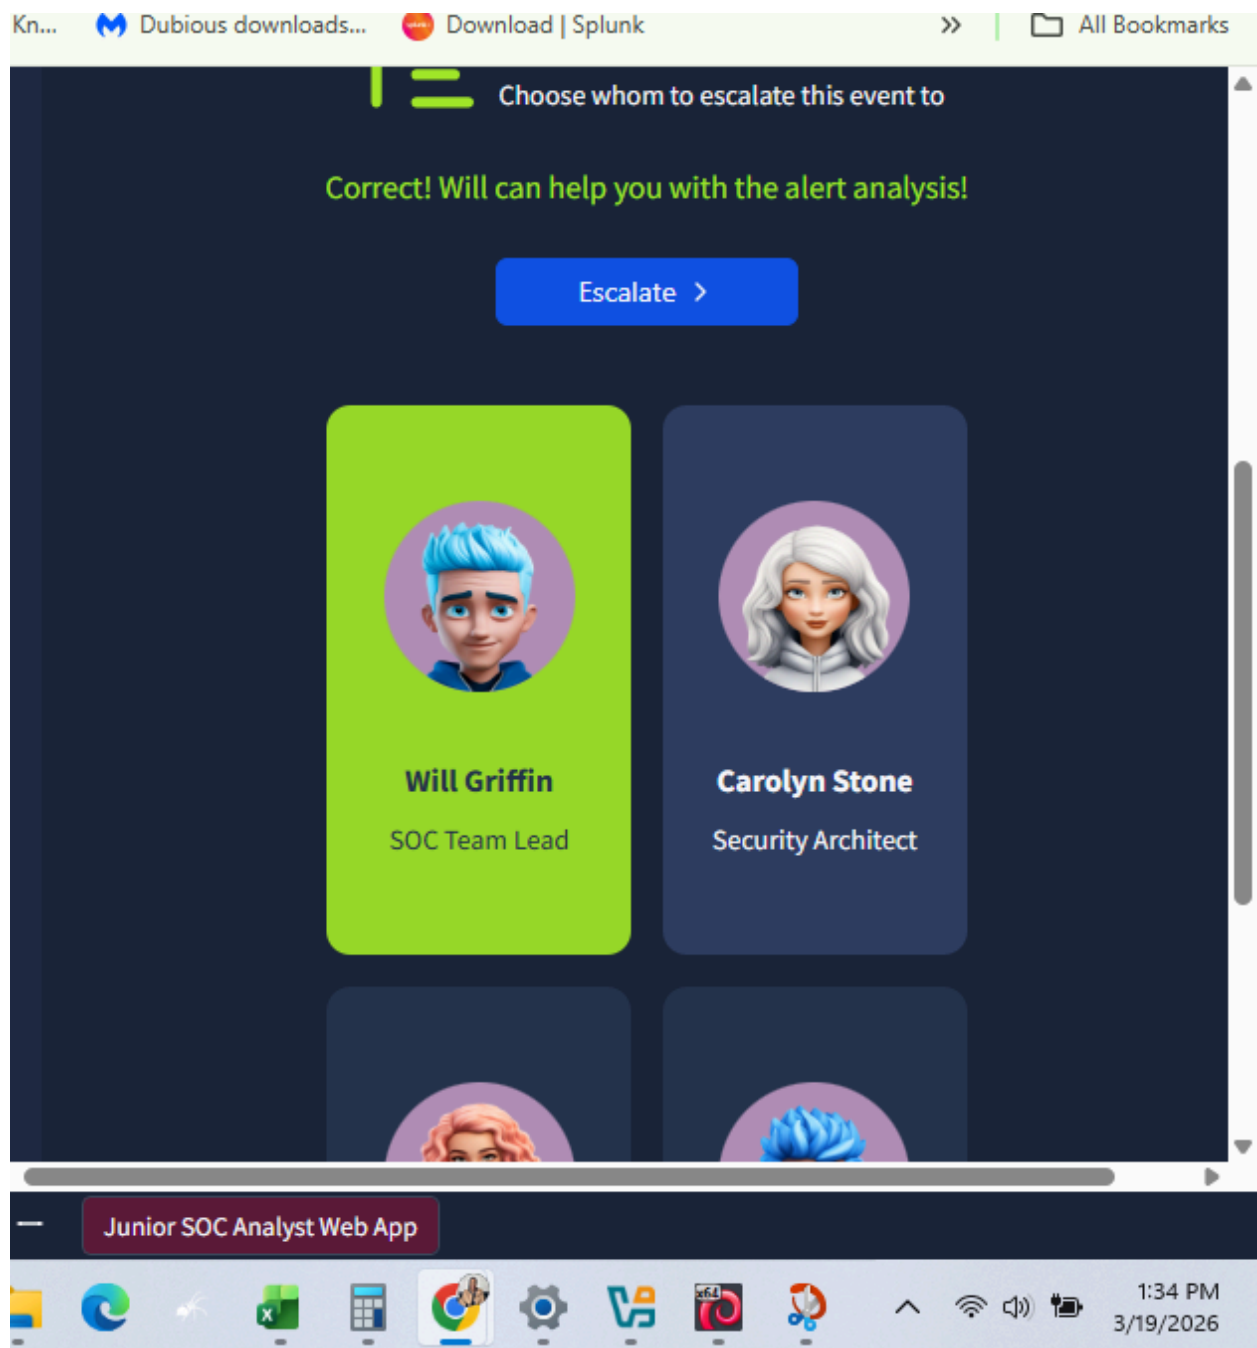

b) What was the malicious IP address in the alerts?

Answer: 221.181.185.159

c) To whom did you escalate the alert with the malicious IP?

Conclusion and summary

I now have a clear understanding of what my day-to-day responsibilities would look like as a Junior Security Analyst. I know who to report to, how to analyze logs, and how to identify and investigate malicious IPs. I am genuinely excited to take on the role of a Junior Security Analyst and contribute effectively to cybersecurity operations.

The screenshot shows a dark-themed interface for a completed module. On the left is a profile icon of a person with headphones and a 'Try Hack Me' logo. To the right, the title 'Junior Security Analyst Intro completed!' is displayed in green and white. Below the title, a message states 'marynyambura657 completed another room on their cyber security journey.' A table-like structure shows three statistics: 'Completed tasks' with a value of 3, 'Points earned' with a value of 32, and 'Streak' with a value of 8. At the bottom, there is a section titled 'Share on social media' with the prompt 'Share your win before starting the next room'. Below this are six buttons for social media sharing: LinkedIn, WhatsApp, Telegram, Twitter/X, Facebook, and Reddit.
